

At MSD Animal Health we demonstrate respect and care for the health and wellbeing of people and the environment in our research, manufacture and supply of animal health products and services.

Our SH&E management systems are subject to review by both the senior management of the company and external verification

We believe that everyone has the right to a safe and healthy working environment, that we earn the right to operate by being effective stewards of the environment, and that all SHE incidents are preventable.

By continuously striving for excellence in SHE, we also protect, enhance and create business value for our organisation.

At all Irish sites we commit to:

Comply with the letter and spirit of all applicable laws, regulations, and other requirements designed to protect safety, health and the environment

Create and maintain a safe and healthy working environment for all employees, contractors, and visitors

Protect our environment and the communities in which we operate; conserve resources, promote recycling, reduce hazardous material use, and prevent pollution

Promote a global standard of care that minimizes SHE impacts from our operations, products and partnerships

Foster a culture of SH&E excellence built upon integrity, accountability, collaboration, and the active participation of all

Continuously improve our SH&E systems, processes, and integration throughout our business through reviewing performance and the setting of objectives

Engage stakeholders and communicate our progress and performance

Provide appropriate resources and build the individual knowledge and capabilities to achieve these commitments.
